

Data Management and Reporting

FELDAR®21 Software

Why limit your fugitive leak detection monitoring program when you can achieve so much more with ARI Environmental's FELDAR®21? Environmental managers and contractors across the USA agree that ARI's FELDAR®21 software is the smartest LDAR software on the market today.

Feldar is user friendly and is designed to easily manage your data and streamline the reporting process. Feldar offers a wide variety of report formats and is designed to eliminate delays during program data sorting. With FELDAR®21 your reports are generated quickly and easily.

FELDAR®21 features include:

- *Powerful, easy to use*
- *Customizable to your specific reporting needs*
- *Compliance geared*
- *Easily interfaces to any portable LDAR instrument*
- *Transparent to field technicians*
- *Works on multiple database options
(DBL, SQL Server, Oracle and
ODBC capable data sources)*

***Our goal is to help you
achieve 100 % compliance.***
