

Refineries & Petrochemical Facilities

Innovative Solutions, 24/7 Coverage

ARI Environmental, Inc. is offering turnkey solutions for compliance with the new HRVOC regulations for flares, process vents and cooling towers.

ARI provides 24/7 coverage for collecting the HRVOC field samples. The samples are analyzed following USEPA Method 18 or TO-14A procedures at our Houston laboratory.

ARI is an established leader in providing air pollution field sampling and laboratory analysis for the petrochemical and oil refining industries.

On-site Low Level Field Analysis:

ARI offers on-site low level ppb analysis of VOC, HAPs, NH₃ and HCl using portable FTIR and GC/MS instrumentation.

- 24-hour On-Call Field Sampling
- In-House HRVOC Analysis
- HRVOC Screening Programs
- Rapid Sample Analysis and Reporting Times
- Testing and Monitoring Plans
- Quality Assurance Plans
- Calibration Audits for On-Line Equipment
- LDAR HRVOC Monitoring
- LDAR Software Solutions
